Profile

Motivated software developer with hands-on experience in Flutter and Front-End Development, passionate about creating user-centered, high-quality applications. Skilled in building responsive and scalable mobile and web interfaces using Flutter, Dart, React, Next.js, TypeScript, and modern UI frameworks. Strong foundation in UI/UX design, component-based architecture, and performance optimization. Eager to contribute to innovative, impact-driven products by applying problem-solving, collaboration, and continuous learning to deliver clean, maintainable code.

Education

Bachelor of Engineering: Informatics Engineering present | Damascus, Syria
Al Sham Private University
5th year ITE

American Highschool Diploma 05/2018 | Riyadh, Saudi Arabia
Future Window International School

Professional Experience

Frontend Web Developer intern 09/2025 – Present | Damascus, Syria
Vica Web Solutions

Passionate about creating user-friendly, responsive, and visually appealing web applications. Skilled in modern frontend technologies including HTML, CSS, JavaScript, TypeScript, React.js, and Tailwind CSS. During my internship, I collaborated with cross-functional teams to design and implement interactive features, improve UI/UX consistency, and optimize website performance. I gained hands-on experience with version control (Git/GitHub), responsive design principles, and integrating APIs to deliver dynamic, data-driven interfaces.

I enjoy problem-solving, learning new technologies, and bringing creative design ideas to life through clean, efficient code. Excited to continue building real-world experience in web development and contributing to impactful projects.

Associate Software Engineer (Flutter Developer) 09/2025 – Present | Bangalore
Paws Pal Connect ☑

Paws Pal Connect is a modern, cross-platform mobile app built with **Flutter**, designed to deliver a smooth, reliable, and beautiful experience on both iOS and Android.

Key Features

- Fast & responsive performance
- Intuitive and user-friendly design
- Secure & scalable architecture
- Available on multiple platforms with one seamless codebase

Whether you're managing tasks, tracking goals, or connecting with others, Paws Pal Connect is built to simplify your daily life with technology that just works.

Our app is powered by **Flutter & Dart**, ensuring consistent updates, native-like performance, and a delightful user experience.

Social Media Admin (Facebook & LinkedIn) 09/2025 – Present | Bangalore, India
Paws Pal Connect ☑

- Managed Facebook and LinkedIn pages to strengthen brand presence and engagement.
- Created, scheduled, and optimized posts to reach wider audiences and maintain consistent activity.
- Monitored page insights and analytics to track performance, identify trends, and adjust campaigns.
- Engaged with followers, responded to messages/comments, and built an active online community.

- Collaborated with the development and marketing teams to align social media campaigns with overall brand strategy.

Front-end Software Engineer

08/2025 – Present | Chicago, IL, USA

Springer Capital

- Built and optimized responsive, accessible web applications using **React.js, Next.js, and TypeScript**.
- Developed reusable UI components with **modern design patterns and Tailwind CSS**, ensuring scalability and consistency.
- Integrated **REST and GraphQL APIs** to deliver real-time, data-driven features.
- Improved performance through **code-splitting, memoization, and testing best practices**.
- Collaborated with senior engineers to enhance design system usability and **align with accessibility standards (WCAG)**.

Flutter App Development

02/2024 – 06/2024 | Damascus, Syria

Focal X Agency

- Delivered production-ready features in Flutter/Dart using Riverpod/GetX and clean architecture; built responsive Material 3 UIs from Figma with reusable widgets, theming, dark mode, smooth 60 fps animations, and full i18n/RTL (Arabic/English) support.
- Integrated REST APIs and Firebase (Auth, Firestore/RTDB, Cloud Messaging) with push notifications, error reporting, offline caching, and graceful retries; improved stability and reduced crash/ANR rates through unit, widget, and golden tests plus static code analysis.
- Set up CI/CD pipelines (Codemagic, GitHub Actions) for TestFlight/Play Console releases with automated versioning and environment configs; created API and setup documentation to accelerate onboarding for new developers.

Projects

Revonix App - Artisan SY App

10/2024 – 07/2025

Graduation project, A-

Created a user-friendly mobile application that enables users to effortlessly find and connect with the artisans they need with a single tap.

Shein Replica

10/2024

Developed a mobile application that replicates the shopping experience of Shein, offering users an intuitive interface to browse and purchase fashion items with ease.

Change Volunteering App

05/2024

Semester project, B+

Developed an intuitive mobile application that streamlines the process of volunteering, allowing users to easily find and participate in voluntary work with a single tap.
